*Creditable Amount – Based on Current Food Buying Guide Yields for ¼ Cup Servings. (Two ¼ Cup Servings = Total Creditable Amount for One ½ Cup Serving)

Total weight (per portion) of product as purchased: 4.75 oz.

I certify that the above information is true and correct (Based On Current Food Buying Guide Yields) and that a 4.75 - ounce serving of the above product (ready for serving) contains 1/2 cup serving of equivalent Fruit when prepared according to directions.

(Reminder: Total creditable amount cannot count for more than the total weight of product)

In order to be creditable, a juice must contain a minimum of 100% full-strength juice and then, only the full-strength juice portion may be counted to meet the VFJ requirement. If less than full strength juice is used, the volume of liquid must be adjusted and credited based on a full strength equivalency. As of November 24, 1997, policy is revised to require that all fruit-juices must be pasteurized. Some kinds of juice and cider have not been pasteurized. Frozen fruit bars must state the amount of 100% fruit juice is contained in each serving. Cooked dried beans or peas may be counted either as a VFJ or as a MMA but not as both in the same meat or food item.
