Attachment A: Sample Soy Company X, Soy Protein Concentrate, Product Y

Documentation for Company X Product(s) Used as Alternate Protein Products (APP) for Child Nutrition Programs

- a) Company X certifies that Product Y meets all requirements for APP intended for use in food manufactured for Child Nutrition programs as described in Appendix A of 7 CFR 210, 220, 225, and 226.
- b) Company X certifies that Product Y has been processed so that some portion of the non-protein constituents have been removed by fractionating. This product is produced from soybeans by removing the majority of the soybean oil and some of the other non-protein constituents.
- c) The Protein Digestibility Corrected Amino Acid Score (PDCAAS) for Product Y is 0.99. It was calculated by multiplying the lowest uncorrected amino acid score by true protein digestibility as described in the Protein Quality Evaluation Report from the Joint Expert Consultation of the Food and Agriculture Organization/World Health Organization of the United Nations, presented December 4-9, 1989, in Rome, Italy. The PDCAAS is required to be greater than 0.8 (80% of casein).
- d) The protein level of Product Y is at least 18% by weight when fully hydrated at a ratio of 2.43 parts water to one part product.
- e) The protein level of Product Y is certified to be at least 61.8% on an *as-is* basis for the *as-purchased* product. (Note: Protein is often provided on a moisture free basis [mfb] which is not the information FNS requires.)

All of the above information is required for APP and must be presented for approval.⁸

(NOTE: It is also helpful to have the ingredient statement for Product Y. For example, if the product is uncolored and unflavored the ingredient statement might be soy protein concentrate or if the product is colored and texture the ingredient statement might be textured vegetable protein (soy flour, caramel color).

⁸ USDA provides approval for protein alternates. Manufacturers that list APP on a Product Formulation Statement must list, by common name, the ingredients used in the formulation of process food products on the label for that product.
